WHO ARE WE?

Accurates is the industry leader and consists of a team of experts dedicated to recovering historic business rates on behalf of clients.

Our national team of audit specialists, including ex local authority tax inspectors know the system from the inside.

HOW WE CAN HELP

Forensic business rate auditors

Due to the complex way business rates bills are calculated, your local authority could be overcharging your business now and may have been for some time. Our business rates specialists can establish if your current and historic business rates bill calculations are correct and challenge them when they're not, ensuring you benefit from all the rebates, relief and exemptions you are entitled to.

We'll also verify the accuracy of calculations and compliance with legislation and case law.
